

## Processes

We are specialists in the transformation and governance of business processes, enterprise architecture management and the technologies that support these disciplines.

Our vocation is to improve people's experience and organizations' performance through a business process-centric approach inspired by innovation and technology.

We apply design principles and practices to help organizations create value, increase their competitive advantage, transform and improve their business, and align with the ever-changing environment.

## Forms of service

### **Governance**

Process governance defines the framework for services, architecture, standards, policies, roles, and responsibilities with the intent to manage the design, improve, and implement the processes and applications.

### **Design and innovation**

We collaborate in the necessary activities to drive change and continuous process through identification, documentation, modeling, analysis, optimization, and innovation.

### **Process mining**

Process Mining is an innovative approach to discover, understand, analyze, and improve processes by analyzing transactional data from systems.

### **Enterprise Architecture**

The analysis, definition, and documentation of information systems architectures in order to relate the strategy and vision of the business through the alignment of the processes and the deployment of information technologies.

## ARIS

We have 20 years of experience with ARIS, the integrated product solution that supports organizations in improving their processes, covering all phases of process analysis and business process management projects.

**CORUS is a PREMIER PARTNER of Software AG**

## Our experience

A process-driven organization encourages and enables its business processes to be oriented towards improving the customer experience and integrating agilely and efficiently with its teams and applications. **Performance is not a matter of luck but of design and adaptability to change.**

We are a team of professionals, with extensive practical experience from different disciplines, who work together offering an efficient combination of analytical and creative thinking as an essential element to tackle transformation and process management projects through the objective analysis of the situation and the incorporation of innovative ideas.

We work with tools and methodologies that allow a high level of cooperation with our clients, maintaining a global and integrated approach, both at the governance level and in the design, change and implementation of business processes.
